

Presentation of Qingdao TV tower

The ancient Chinese used the idiom "hua xin nian hua" to describe a 24-year-old girl who was as young and bloomed like a flower. Qingdao TV tower has also its own huaxin age.

Two beautiful spots of huaxin age: The newly opened yunjing revolving restaurant has set a new benchmark in the food industry of Qingdao with its elegant dining environment and first-class delicious dishes. The all-tower system has been updated to re-light the tower.

The new highlights also mean new growth opportunities, this year, SCO was held in Qingdao, the city has become the focus of attention in the world, as a landmark of Qingdao, the TV tower also takes advantage of its location and greets friends from all over the world with its best posture.

At night, when the TV tower is lit up with dazzling lights, the night sky of Qingdao is even more decorated, we opened night sightseeing this year. By the end of August 2018, the actual number of tourists to Qingdao TV tower is more than 145000, which is a significant increase from the same period last year.

Behind the bloom, we are facing the urgency of upgrading the traditional function industry, the traditional way of travelling, which takes the city view as the main selling point, has been difficult to arouse the interest of modern young people. Experiential projects, such as the glass walkway, the rapid fall of the air, etc. are being spread all over the country, whether to catch up, or to find a new path, these are the issues to think about.
